## Enhancements/Changes in Version 21.1

### What's New?

#### Installer Updates

New customers across all ERPs will experience an easy and intuitive installation process.

#### Designer GL Profile Reconfiguration for NetSuite

New Spreadsheet Server Customers using NetSuite will now see automated updates to Designer GL profiles when new segments are added.

### Fixes and Errors Corrected

#### Build a Template

Resolved issues with retrieving segments when using DSN for all Designer General Ledgers.

#### Profile Scheduler

Fixed the issue with Profile Scheduler hanging after running a distribution job.

#### Drill Down

- Resolved issue with drilldown intermittently showing duplicate option to users.
- Fixed issue with drilldown generating inconsistent balance when using different currencies.
- Corrected UX issues - when drilling down to Journals in a Designer General Ledger, OK and Cancel buttons were cut off.

#### Segment List

Fixed issue with the function copy not working in a segment list.

#### GEXQ

Corrected the issue with GEXQ summary not working in excel.

#### Clear Cache and Recalculate

Resolved the errors with clear cache and recalculate selected cells functionality.

#### Query Designer Log Viewer

Fixed missing SQL in the Query Designer logs.

#### GXL

- Resolved the issue with Category Codes where set value to upper case was not working.
- Fixed issues with Segment Security where Oracle security was applied to a Designer General Ledger.

#### ERP Specific Fixes and Errors Corrected

##### Infinium

Fixed issues with Spreadsheet Server's account security profile.

##### JDE

Resolved the issue with JDE Data Dictionary not applying correctly to queries.

##### Oracle

- Fixed Collapse All GL rows functionality that would clear all details.
- Resolved issues with Spreadsheet Server's ability to handle duplicates in Oracle responsibilities.

##### SAP

- Fixed AdHoc Journal drilldown for SAP S/4 HANA.
- Fixed errors with SAP TCode causing issues with inserting formula to excel.

THE APPLICATION USER MANUAL HAS BEEN UPDATED TO REFLECT ALL CHANGES.

## Enhancements/Changes in Version 21.1.1

### ERP Specific Fixes and Errors Corrected

#### Lawson

Resolved errors preventing the use of HSegments: When using Hsegment with Lawson, \_Accoutn would get added to the HSegment.

## Enhancements/Changes in Version 21.1.2

### Fixes and Errors Corrected

#### Drill Down

Fixed Drilldown using Sub Queries.

### ERP Specific Fixes and Errors Corrected

#### Oracle

Added Translated Flag option back to the Formula Assistant.

#### Movex

Fixed the issue with Query Designer to allow users to add unique rows and a summary field to a query.

## Enhancements/Changes in Version 21.1.3

### ERP Specific Fixes and Errors Corrected

#### Lawson

Resolved errors preventing the use of Hsegments functionality.
