Enhancements/Changes in Version 21.4

What's New?

Performance Optimization

- Addition of enhanced performance logging to inspect performance degradation.
- Increased the default number of tasks and DBTaskLimit to 30.

Miscellaneous

- Licensed Query Designer users can now launch Query Designer from Spreadsheet Server Ribbon.
- Added the ability to for Distribution Manager to combine macro-enabled workbooks.

Fixes and Errors Corrected

Query Designer

- Fixed issue where tables didn't load when a new query was opened.
- Fixed issue with queries showing duplicate fields in tables.
- Added the ability to display alias in expression builder's table.
- Added the ability to enter a special character when typing in the alias field.
- Corrected SQL query where parentheses were being removed in not auto generated SQL code.
- Fixed the ability to handle null values and generate accurate outcomes.
- Corrected total field defaulting to GroupBy and leading to errors.
- Corrected non-auto generated SQL with smart parameters missing an AND.

Drill Down

- Fixed issues with drill down To GL Journals not working with cell containing more than 255 Characters.
- Fixed issue with drill down failing if there is a LEFT(), RIGHT(), or MID().
- Fixed group by segments functionality for JDE customers.
- Fixed second-level drill down errors for Infinium customers.
- Fixed AdHoc drill down failing to work due to connection issues.

Excel Add-In

- Improved Excel's start and close performance with Spreadsheet Server add-in enabled.
- Fixed clear cache and recalculate functionality.

GXL

- Fixed old GXL functions (v14.12.1) not returning values after upgrading to the latest version.
- Corrected issues with HSegments not working in GXL.

GEXQ

Corrected errors related GEXQ summary field not working for SAP customers.

THE APPLICATION USER MANUAL HAS BEEN UPDATED TO REFLECT ALL CHANGES.

Enhancements/Changes in Version 21.4.1

Fixes and Errors Corrected

Query Designer

Fixed issue with descriptions not available when selecting fields from tables while adding or editing calculated fields.

GEXD

Fixed EdExtended.ResetConnectionFromSS error for NetSuite users.

Enhancements/Changes in Version 21.4.2

Fixes and Errors Corrected

Query Designer

- Fixed incorrect syntax errors when users run 1000 records.
- Fixed issue with the connection string not allowing tables to load.

Connection

- Fixed Query Designer login issues while using DSN with SQL Server syntax and Prompt for Input checked.
- Fixed the ability to connect to Deltek database using a SQL database.

GL Reports

Fixed issue with reports generating incorrect results for large queries.
