## Enhancements/Changes in Version 22.3

### What's New?

#### Query Designer

- Updated homepage for Query Designer users to view up to 25 recent queries with additional details.
- Re-introduced Case Builder.
- Included the ability to right click and select all cells.
- Included the ability to print from results container.
- Updated tools section to allow users to change connection for a specific folder, file, or a sub-folder.
- Introduced two new settings:
  - Users can choose to auto-alias their tables [First 3 letters will be selected as alias].
  - Users can choose the default tab they want to view when right clicking for tables/views/favorites/queries window.
- Included the ability to hide and unhide tables.
- Note: Table will be hidden in internal cache database.
- Replaced toggle totals icon to re-introduce GEXQ field (Summary) on the ribbon.

#### Drill Down

Introduced print functionality from within the drilldown results window.

#### Installer

Included a new screen on Installer to allow new users to select their ERP. This will allow for:

- Competitor ledger references to be hidden across the product.
- Copying of unnecessary files and folders to be restricted during install.

#### Miscellaneous

Locked format dropdown in formula builder for GXL; users can no longer enter freeform text.

### Fixes and Errors Corrected

#### Spreadsheet Server Control Panel

Fixed the ability to create and maintain segment lists from Control Panel.

#### Licensing

Fixed Budget Accelerator license validation issue.

### Excel Add-In

Corrected ledger selection screen available for new users to set up security path.

### Settings

Fixed issue with using % as the Range delimiter.

### Query Designer

- Fixed issues with PostgreSQL syntax compatibility.
- Fixed issues with Group by functionality.

### Distribution Manager

Corrected errors with Distribution Manager not sending files when total rows feature was used.

### Licensing

Introduced licensing grace period to address issues with licensing server. When licensing server is down, 7 days grace period will be applied to: Excel Add-in, Query Designer, Profile Scheduler, and Control Panel.

### Sub-Query

Fixed issue with sub-queries to ensure data is returned.

### Query Designer

Fixed issue with Query Designer not displaying the list of tables when creating a new query.

### GEXQ

Fixed errors GEXQs that used to return 0 would return null.

### JDE – Drill Down

Fixed JDE first level drilldown failing to generate results.

### JDE – GXL

Fixed GXL generating null result when Sub account is "" or blank.

THE APPLICATION USER MANUAL HAS BEEN UPDATED TO REFLECT ALL CHANGES.

## Enhancements/Changes in Version 22.3.2

### Fixes and Errors Corrected

#### Query Designer

- Fixed issue with tables not loading while using a PostgreSQL database.
- Fixed incorrect SQL Generated from DSN for PostgreSQL connection type.
- Fixed save query functionality for select users.

#### GXL

Fixed issue with GXL returning 0 instead of correct values.
